

ENERGY STORAGE SOLUTIONS

LITHIUM-ION BATTERIES FROM CALB

AVRC is the Factory Representative for CALB products. CALB is a China-Based high-tech (electric energy storage) company specializing in the production of Li-ion batteries, Battery Management Systems (BMS) and other related products.

With its advanced technology, reliable quality and strong customer service, CALB is now the leading company in high capacity, high power and long life Li-ion batteries for power-trains and other industrial applications, such as locomotives, electric energy storage (for solar and wind turbine generators), mining, communication applications, power tools, ships, special vehicles, UPS, aircraft and other equipment. CALB owns more than thirty patents and is ISO9001A qualified.

AVRC uses CALB batteries for running tests on our Laboratory Rapid Application Test-bed. A video of one of these test runs can be viewed at this website: <http://www.youtube.com/watch?v=jdDriPdFvww>

Several of the more popular CALB brands and their Retail prices are below.

AVRC can provide significant volume discounts from the published retail price-list below, feel free to contact us to provide a quote for your energy storage needs by calling Richard Dell at 919.602.4784 or by emailing batteries@avrc.com

	<p>40 AMP-hour lithium-ion battery</p> <p>Retail unit price: \$50.40</p>		<p>60 AMP-hour lithium-ion battery</p> <p>Retail unit price: \$75.60</p>		<p>100 AMP-hour lithium-ion battery</p> <p>Retail unit price: \$126.00</p>
